

Supplementary Table 1. Hematologic and non-hematologic dose-limiting toxicities.

Hematologic	Non-hematologic
<ul style="list-style-type: none"> • Absolute granulocyte count $<0.5 \times 10^9/L$. • Febrile neutropenia (ANC $<1.0 \times 10^9/L$, fever $>38.5^\circ C$). • Platelets $<25 \times 10^9/L$. • Bleeding due to thrombocytopenia, as determined by a physician. 	<ul style="list-style-type: none"> • Diarrhoea $>$ grade 3 despite optimal loperamide use. • Rash $>$ grade 3 or grade 2 is medically concerning or unacceptable to the patient. • Other grade 3 effects considered to be treatment related. • Missing >7 days of treatment for toxicity reasons.

Grading of side effects is performed using CTCAE. Abbreviations: ANC, absolute neutrophil count.
